Intermediate Microeconomics without Calculus
EconS 305

Please see below for a brief overview of EconS 305. Instructors will provide a full Syllabus at the beginning of the course.

Course Overview:

Price determination and market behavior under different market structures and the problems posed for public policy; not calculus-based.

Student Learning Outcomes:

By the end of the semester students will have accomplished the following:

1. Learned how consumers and firms solve their decision problems.
2. Learned the properties of supply and demand and the relationship between them and the underlying behavior of the consumers and firms.
3. Learned the properties of market equilibrium.
4. Learned the differences in market structure among perfect competition, monopoly, monopolistic competition, and strategic behavior.
5. Learned why some markets fail and various policies that can alleviate a market failure.
