Introduction to Farm and Ranch Management
EconS 350

Please see below for a brief overview of EconS 350. Instructors will provide a full Syllabus at the beginning of the course.

Course Overview:

Decision making, planning, implementation and control of farms and ranches using economic principles, records, financial reports, budgeting and investment analysis.

Course Objectives and Student Learning Outcomes:

Students successfully completing this course will:

1. Learn basic management principles for managing and operating a commercial farm or ranch.
2. Become acquainted with farm records, financial statements, budgets, and other tools used for planning, evaluating and implementing decisions.
3. Be able to demonstrate applications of principles and logic in solving typical management problems.
