The internet has changed the way people consume news. This talk will discuss the implications of these changes for the viability of journalism, as well as for the types of news that are consumed. We explore the role of social media and news aggregators on reading patterns, including reader loyalty, diversity of political perspectives, and in-depth reporting.

**BIO:** Athey is Economics of Technology Professor at the Stanford Graduate School of Business, where she received her Ph.D. in 1995. She previously held professorships at Harvard and MIT. She has served as a long-term economics consultant to Microsoft. Her research focuses on the economics of the internet, marketplace design, auction theory, the statistical analysis of auction data, and the intersection of econometrics and machine learning. She has focused on several applications, including internet search, online advertising, the news media, and virtual currency. Her honors include being the first female recipient of the John Bates Clark Medal which is given by the AEA to the American economist under the age of 40 who is judged to have made the most significant contribution to economic thought and knowledge, Member of the National Academy of Sciences, Fellow of the Econometric Society, Fellow of the American Academy of Arts and Sciences and the Elaine Bennett research award.

Friday, September 5, 7:00 pm, Todd Hall 116
